McMurdo & Jang Bogo NEUTRON MONITER STATIONS

Jang Bogo

McMurdo

McMurdo & Jang Bogo NEUTRON MONITER STATIONS

- McMurdo NM station (from <http://www.nmdb.eu>)

Specifications:	
Detector	Standard 18-NM64 neutron monitor in three units of six BF3 counters.
Geographic latitude	77.90° S
Geographic longitude	166.6° E
Altitude	48 m
Effective vertical cutoff rigidity (Epoch 2010.0)	0.3 GV
In continuous operation since	1960-05-11
Detailed station information	11 May 1960 - 20 October 2016

McMurdo & Jang Bogo NEUTRON MONITER STATIONS

- Jang Bogo NM station (from <http://www.nmdb.eu>)

Specifications:	
Detector	Standard 6-NM64 neutron monitor (1 tube has broken)
Geographic latitude	74.62° S
Geographic longitude	164.23° E
Altitude	29 m
Effective vertical cutoff rigidity (Epoch 2010.0)	0.3 GV
In continuous operation since	2015-12-16
Detailed station information	16 December 2015 - present

Pressure vs DOY2016

JBGO & MCMU

JBGO : Pressure vs DOY2016

MCMU : Pressure vs DOY2016

Pressure Coefficient 1 Minutes Data

PRESSURE CORRECTION

$$C = C_0 e^{\beta(p-p_0)}$$

$$\ln \frac{C}{C_0} = \beta(p - p_0)$$

$$\frac{C}{C_0} = e^{\beta(p-p_0)}$$

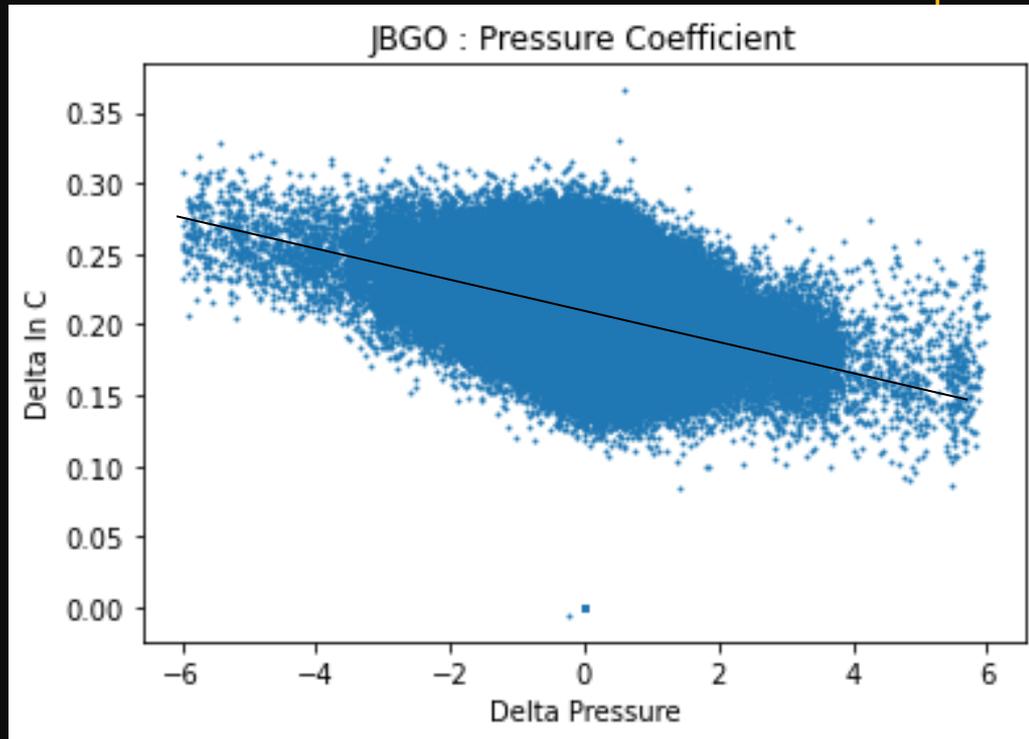

$$\ln c - \ln c_0 = \beta(p - p_0)$$

$$\ln c - \ln c_{aver} = \beta(p - p_{aver})$$

$$\beta = \frac{\ln c - \ln c_{aver}}{p - p_{aver}}$$

Pressure Coefficient (JBGO)

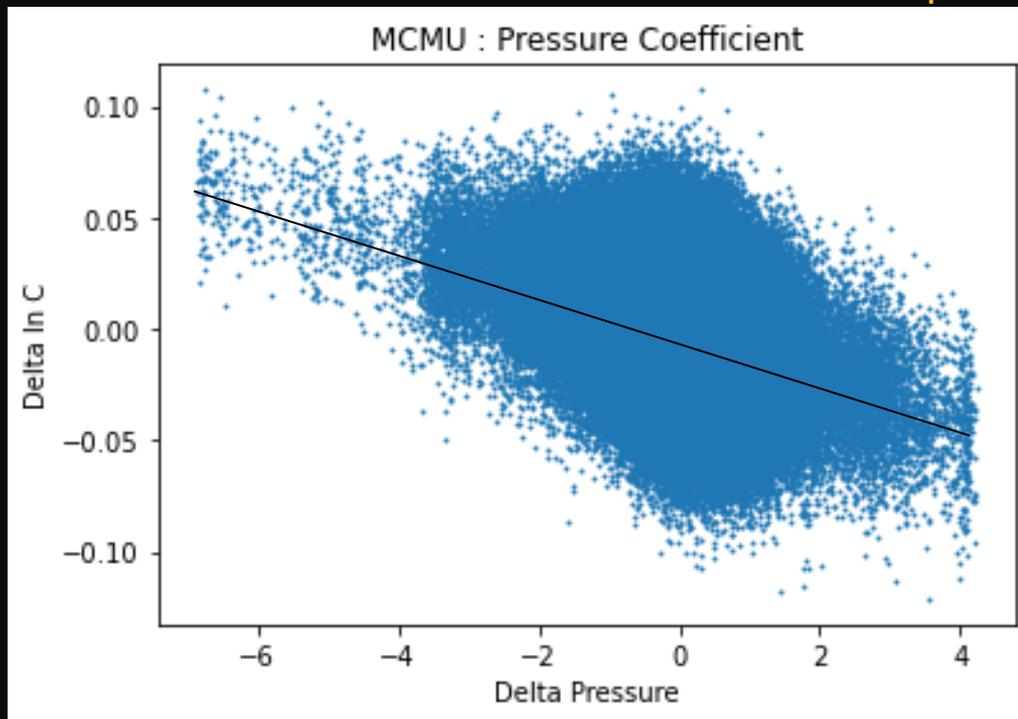

Slope = -0.009732624442658905

$P_0 = 737.8157871971658$

Pressure Coefficient (MCMU)

Slope = -0.010102266359612073

$P_0 = 733.9848292803707$
